

# listVenues

## Operation

### listVenues

List< [VenueResult](#) > listVenues ( [MarketFilter](#) filter ,Stringlocale ) throws [APINGException](#)

Returns a list of Venues (i.e. Cheltenham, Ascot) associated with the markets selected by the MarketFilter. Currently, only Horse Racing markets are associated with a Venue.

Parameter name	Type	Required	Description
filter	<a href="#">MarketFilter</a>	✓	The filter to select desired markets. All markets that match the criteria in the filter are selected.
locale	String		The language used for the response. If not specified, the default is returned.

Return type	Description
List< <a href="#">VenueResult</a> >	output data

Throws	Description
<a href="#">APINGException</a>	Generic exception that is thrown if this operation fails for any reason.
