

listCompetitions

Operation

listCompetitions

List< [CompetitionResult](#) > listCompetitions ([MarketFilter](#) filter ,Stringlocale) throws [APINGException](#)

Returns a list of Competitions (i.e., World Cup 2013) associated with the markets selected by the MarketFilter. Currently only Football markets have an associated competition.

Parameter name	Type	Required	Description
filter	MarketFilter	✓	The filter to select desired markets. All markets that match the criteria in the filter are selected.
locale	String		The language used for the response. If not specified, the default is returned.

Return type	Description
List< CompetitionResult >	output data

Throws	Description
APINGException	Generic exception that is thrown if this operation fails for any reason.
