

New API-NG Release - 24th February 2014

This release is now live on the UK Exchange only. The release to the Aus Exchange has been delayed, and the current ETA is the **17th March**

The release includes the following updates:

- **listCurrentOrders** - addition of **dateRange** parameter to allow the user to specify a date and time to start from for the list of returned bets.
- **listMarketCatalogue** - will return an additional field, **totalMatched**, by default.

Defects Fixed in this release

- **DE23961** - listClearedOrders - moreAvailable Parameter Returns 'false' if recordCount is set to 1000
