Betting Exceptions

Exceptions

APINGException

This exception is thrown when an operation fails

Error code	Description
TOO_MUCH_DATA	The operation requested too much data, exceeding the Market Data Request Limits. You must adjust your request parameters to stay with the documented limits.
INVALID_INPUT_DATA	The data input is invalid. A specific description is returned via errorDetails as shown below.
INVALID_SESSION_INFORMATION	The session token hasn't been provided, is invalid or has expired. Login again to create a new session
NO_APP_KEY	An application key header ('X-Application') has not been provided in the request.
NO_SESSION	A session token header ('X-Authentication') has not been provided in the request
UNEXPECTED_ERROR	An unexpected internal error occurred that prevented successful request processing.
INVALID_APP_KEY	The application key passed is invalid or is not present
TOO_MANY_REQUESTS	There are too many pending (in-flght) requests e.g. a listMarketBook with Order/Match projections is limited to 3 concurrent requests. The error also applies to: • listCurrentOrders, listMarketProfitAndLoss and listClearedOrders if you have 3 or more requests currently in execution. • placeOrders, cancelOrders. updateOrders, replaceOrders if the number of transactions submitted exceeds 1000 in a single second.
SERVICE_BUSY	The service is currently too busy to service this request.
TIMEOUT_ERROR	The Internal call to downstream service timed out. **Please note:** If a TIMEOUT error occurs on a placeOrders/replaceOrders request, you should check listCurrentOrders to verify the status of your bets before placing further orders. Please Note: Timeouts will occur after 5 seconds of attempting to process the bet but please allow up to 15 seconds for a timed out order to appear. After this time any unprocessed bets will automatically be Lapsed and no longer be available on the Exchange.
REQUEST_SIZE_EXCEEDS_LIMIT	The request exceeds the request size limit. Requests are limited to a total of 250 betId's/marketId's (or a combination of both).
ACCESS_DENIED	The calling client is not permitted to perform the specific action e.g. they have an App Key restriction in place or attempting to place a bet from a restricted jurisdiction.

Other parameters	Type	Required	Description	Values
errorDetails	String		the stack trace of the error	"market id passed is invalid"
				"locale must use valid iso-639 locale names"
				"currency must use valid iso2 currency code name"
				"country code must use valid iso2 country code name"
				"text query has invalid content"
				"language must use valid iso language name"
requestUUID	String			

Generic JSON-RPC Exceptions

Error Code	Description
-32700	Invalid JSON was received by the server. An error occurred on the server while parsing the JSON text.
-32601	Method not found
-32602	Problem parsing the parameters, or a mandatory parameter was not found
-32603	Internal JSON-RPC error
